Teaching /Learning Methods:

Registered students of BIT degree program can access learning materials and the syllabus in the VLE: <http://vle.bit.lk>. It is important to participate in learning activities given in the VLE to learn this subject.

Assessment Strategy:

Continuous Assessments/Assignments:

The assignments consist of two quizzes, assignment quiz 1 (It covers the first half of the syllabus) and assignment quiz 2 (It covers the second half of the syllabus). The maximum mark for a question is 10 and the minimum mark for a question is 0 (irrespective of negative scores). Final assignment mark is calculated considering both assignments, and students will have to obtain at least 40% for each assignment. Students are advised to complete online assignments before the given deadline. It is compulsory to pass all online assignments to qualify to obtain the Level I, Diploma in IT (DIT), certificate.

In the course, case studies/Lab sheets will be introduced, and students have to participate in the learning activities.

Final Exam:

The final examination of the course will be held at the end of the semester. The paper consists of 40 MCQs and candidates have to answer all the 40 questions within 2 hours.
