

## UNIVERSITY OF COLOMBO, SRI LANKA

## UNIVERSITY OF COLOMBO SCHOOL OF COMPUTING

## DEGREE OF BACHELOR OF INFORMATION TECHNOLOGY (EXTERNAL)

Academic Year 2015/2016 – 2<sup>nd</sup> Year Examination – Semester 3

IT3405 – User Interface Design PART 1 - Multiple Choice Question Paper

8<sup>th</sup> May, 2016 (ONE HOUR)

## Important Instructions:

- The duration of the paper is 1 (one) hour.
- The medium of instruction and questions is English.
- The paper has **25 questions** and **06 pages**.
- All questions are of the MCQ (Multiple Choice Questions) type.
- All questions should be answered.
- Each question will have 5 (five) choices with one or more correct answers.
- All questions will carry equal marks.
- There will be a penalty for incorrect responses to discourage guessing.
- The mark given for a question will vary from 0 (All the incorrect choices are marked & no correct choices are marked) to +1 (All the correct choices are marked & no incorrect choices are marked).
- Answers should be marked on the special answer sheet provided.
- Note that the questions appear on both sides of the paper.

  If a page is not printed, please inform the supervisor immediately.
- Mark the correct choices on the question paper first and then transfer them to the given answer sheet which will be machine marked. Please completely read and follow the instructions given on the other side of the answer sheet before you shade your correct choices.

	(a) Microphone	(b) Speakers	(c) CPU
	(d) Keyboard	(e) LCD	
2)	Which of the following is/ar	e true about perceptual compu	uting?
	(a) It uses voice command	nds, facial recognition, and ge	esture controls.
	(b) Sensor data is used to	o find out the user's intentions	S.
	(d) It could be implement	ractions with the computing of the description in the description in t	
	(c) it removes the interior	see our our the ager and the c	
3)	1 1	1 2	mbiosis" which can be explained as ghtly to revolutionize information
	(a) Douglas Engelbart	(b) Alan Kay	(c) Tim Berners Lee
	(d) Vannevar Bush	(e) J.R. Licklider	
4)	What is/are true with respect	t to Long Term Memory (LTM	M) of humans?
	(a) It is not continuously	overwritten.	
	(b) Finding patterns in da	ata makes it easier to remembe	er.
	(c) The capacity of the L	TM is severely limited.	
	(d) In LTM, it is always	easy to retrieve.	
	(e) Rehearsal affects stor	ing data in LTM.	
5)	Which of the following is/ar	e true with respect to the hum	an visual system?
	(a) The movement and c	hanges in luminance may not	affect recognition.
	(b) Overcompensation c	ould result in optical illusions	S.
	(c) Context always creat		
	_	n occur due to ambiguity. Indof ability to perceive detail	
6)	What is/ara the main reason	's for prototyping?	
6)	What is/are the main reason/	s for prototyping:	

1) Identify a device/s which is/are <u>not</u> part of user interface of a personal computer.

	•	
	(b) To test the capacity of the devel	opment team
	(c) To improve the skills of the inte	erface designers
	(d) To eliminate the design errors o	f a system
	(e) To experiment with alternative	designs
	· · ·	
)   7	Which of the following is/are <b>not</b> (a) PA	ACT alamanta?
′  <b>`</b>	which of the following is/are <b>not</b> (a) F	ACT elements?
	(a) People	(b) Communities
	(c) Attractiveness	(d) Techniques
	(e) Context	
1	What is/are the advantage/s of multimod	dal interaction?
	(a) Communicating more information	ion per time unit
	(b) Facilitates alternative ways to c	communicate
	(c) Enabling more conscious intera	
	(c) Enabling more conscious intera	action
	(d) Require little computational req	quirements
	-	quirements
	<ul><li>(d) Require little computational require</li><li>(e) Better acceptance among inexp</li></ul>	quirements perienced users
	(d) Require little computational require (e) Better acceptance among inexp  Which of the following technique/s can	quirements perienced users
	(d) Require little computational require (e) Better acceptance among inexp  Which of the following technique/s can process of a product?	quirements perienced users
	(d) Require little computational require (e) Better acceptance among inexp  Which of the following technique/s can process of a product?  (a) Interviews and questionnaires	quirements perienced users
	(d) Require little computational require (e) Better acceptance among inexp  Which of the following technique/s can process of a product?  (a) Interviews and questionnaires (b) Usability testing	quirements
	(d) Require little computational require (e) Better acceptance among inexp  Which of the following technique/s can process of a product?  (a) Interviews and questionnaires (b) Usability testing (c) On-site observations	quirements perienced users
p	(d) Require little computational require (e) Better acceptance among inexp  Which of the following technique/s can process of a product?  (a) Interviews and questionnaires (b) Usability testing (c) On-site observations (d) Code reviews (e) Acceptability testing	perienced users  be used to involve users in the design and developmen
r	(d) Require little computational require (e) Better acceptance among inexp  Which of the following technique/s can process of a product?  (a) Interviews and questionnaires (b) Usability testing (c) On-site observations (d) Code reviews (e) Acceptability testing  Which of the following statement/s is/ar	perienced users  be used to involve users in the design and developmen  re true with regard to human errors?
p	(d) Require little computational require (e) Better acceptance among inexp  Which of the following technique/s can process of a product?  (a) Interviews and questionnaires (b) Usability testing (c) On-site observations (d) Code reviews (e) Acceptability testing	re true with regard to human errors?
p	(d) Require little computational require (e) Better acceptance among inexp  Which of the following technique/s can process of a product?  (a) Interviews and questionnaires (b) Usability testing (c) On-site observations (d) Code reviews (e) Acceptability testing  Which of the following statement/s is/ar	re true with regard to human errors?
r	(d) Require little computational require (e) Better acceptance among inexp  Which of the following technique/s can process of a product?  (a) Interviews and questionnaires (b) Usability testing (c) On-site observations (d) Code reviews (e) Acceptability testing  Which of the following statement/s is/ar  (a) Slips can be minimized by better	perienced users  be used to involve users in the design and development of the design and develo
r	(d) Require little computational require (e) Better acceptance among inexp  Which of the following technique/s can process of a product?  (a) Interviews and questionnaires (b) Usability testing (c) On-site observations (d) Code reviews (e) Acceptability testing  Which of the following statement/s is/ar  (a) Slips can be minimized by bette (b) Mistakes can be avoided by giving	perienced users  be used to involve users in the design and development  re true with regard to human errors?  er interface design.  ting feedback to the user.  ean reduce human errors.

(a) Web computing.	
(b) Ubiquitous computing	;.
(c) Pervasive computing.	
(d) Soft computing.	
(e) Wearable computing.	
Which of the following is/are nteraction?	true with respect to ergonomics in the human-computer
(a) Ergonomics lowers op	perational costs of running a business.
(b) Ergonomics improves	workplace processes and procedures.
<ul><li>(c) Ergonomics cannot be</li><li>(d) Ergonomics improves</li></ul>	e achieved by workspace arrangement. employee's health.
(e) Ergonomics does not a	affect employee's job satisfaction.
Which of the following is/are	elements of a form based interface?
(a) Activities	(b) Regions
(c) Radio buttons	(d) Blocks
(e) Message boxes	
According to ISO 9241 standatandards?	ard, which of the following is/are correct with respect to usability
(a) Effectiveness, robustn	ess and learnability
(b) Effectiveness, efficien	•
(c) Flexibility, effectivened	•
(d) Easy-to-Learn, efficient (e) Easy-to-Use, effective	·
	ystem. 10 seconds later, nothing appears on the screen and you m is working", which of following usability principle/s can be?
sed to describe this situation?	
	(b) Observability
sed to describe this situation?	(b) Observability (d) Predictability

16)

12)

13)

14)

15)

	(a) Don't make me think	(b) Make it curious
	(c) Make it readable	(d) Make it accessible
	(e) Make it graphical	
	Which of the following is/are correct a	bout personas in the user centred design?
	(a) They are always descriptions of	f real users of the system.
	(b) They help the users of the systematical and the	em to understand it more.
	(c) They help the designers to und	erstand the users deeply.
	(d) They are some representative u	isers.
	(e) It is important to develop sever	ral personas for a new system.
,	Which of the following is/are rarely us	ed in human computer interaction?
	(a) Body movement	(b) Smell
	(c) Vision	(d) Touch (Haptic)
	(e) Taste	
,	Which of the following statement/s is/s	are true with regard to menus?
	Which of the following statement/s is/s  (a) Menus help better navigation.	<del>-</del>
,	Which of the following statement/s is/s  (a) Menus help better navigation.  (b) Keyboard accelerators give the	same effect as menu items.
	Which of the following statement/s is/s  (a) Menus help better navigation.  (b) Keyboard accelerators give the (c) Number of items does not affect	e same effect as menu items.
	Which of the following statement/s is/s  (a) Menus help better navigation.  (b) Keyboard accelerators give the (c) Number of items does not affect (d) Pie menus, pop-up menus, and	e same effect as menu items.  ct the menu.  pull-down menus are types of main menus.
	Which of the following statement/s is/s  (a) Menus help better navigation.  (b) Keyboard accelerators give the (c) Number of items does not affect	e same effect as menu items.  ct the menu.  pull-down menus are types of main menus.
	Which of the following statement/s is/s  (a) Menus help better navigation.  (b) Keyboard accelerators give the (c) Number of items does not affect (d) Pie menus, pop-up menus, and	e same effect as menu items.  ct the menu.  pull-down menus are types of main menus.  appearance of the menu.
	(a) Menus help better navigation. (b) Keyboard accelerators give the (c) Number of items does not affect (d) Pie menus, pop-up menus, and (e) User interaction may affect the	e same effect as menu items.  ct the menu.  pull-down menus are types of main menus.  appearance of the menu.
	(a) Menus help better navigation. (b) Keyboard accelerators give the (c) Number of items does not affect (d) Pie menus, pop-up menus, and (e) User interaction may affect the	e same effect as menu items.  ct the menu.  pull-down menus are types of main menus.  appearance of the menu.  pout people in PACT analysis?

Which of the following is/are considered as (a) usability guideline/s?

- Which of the following statement/s is/are correct with regard to computing devices? (a) OWERTY arrangement of keys on the keyboard is optimal for typing. (b) Thumbwheels are used to improve precision in Computer Aided Design (CAD). (c) Scanners convert paper into a bitmap. (d) Optical Character Recognition (OCR) converts a bitmap to editable text. (e) Accuracy of speech recognition does not depend on the user. Observation is the main tool for task analysis. Identify key things to be observed in the task 22) analysis? (a) What is the context of a task? (b) What does the user need to know? (c) What does the user do? (d) Who helps the user to carry out the task? (e) What are the objects with which the user interacts? 23) The usability principle/s that support/s an evaluation of a software system is/are, (a) Visibility (b) Structure (c) Reusability (d) Conviviality (e) Recovery 24) Why do we need a help system for an application? (a) To educate the end user about the application (b) To guide the user to complete a task (c) To identify the future needs of the end user (d) To show the benefits of a product (e) To assist the user when he could not solve a problem in the application 25) Which of the following statement/s is/are true about assistive technologies? (a) They reduce the accessibility issues of differently abled people. (b) The web browser that spells out a web page is an example of assistive technology. (c) Screen enlarger is not an example of an assistive technology.
  - (d) Ability to input voice as a substitute for mouse/keyboard controls

  - (e) On-screen virtual keyboard is an example of an assistive technology.
